# Generic Topics on Medical Humanities to be taught in Phase -III

The following two topics will be taught within  $3^{rd}$  phase under supervision of Phase-III coordination committee in collaboration with medical education unit (MEU). The sessions will be under the guidance of Principal & Vice-principal, coordinated by concerned departments and sessions will be delivered by concerned experts of the topics. Each session will be one and half hour. Attending these session will be mandatory and will be reflected in the formative & summative assessment of Phase-III.

## **Topics:**

- 1. Integrity and accountability of medical professionals
- 2. Aspects of a good doctor

Topics	Learning objective	List of Contents	Method	Time
Integrity and accountabilit y of medical professionals	<ul> <li>define integrity and accountability in medical practice</li> <li>mention importance of integrity and accountability in medical practice</li> <li>outline doctors behaviors that demonstrate integrity and accountability.</li> <li>explain contribution of the team and the system to integrity and accountability</li> <li>state means of developing integrity and accountability of medical professionals</li> <li>mention some current examples of Integrity and accountability of medical professionals</li> </ul>	<ul> <li>Definition of integrity and accountability in medical practice</li> <li>Importance of integrity and accountability in medical practice</li> <li>Outline of doctors behaviors that demonstrate integrity and accountability.</li> <li>Contribution of the team and the system to integrity and accountability</li> <li>Means of developing integrity and accountability of medical professionals</li> <li>Some current examples of Integrity and accountability of medical professionals</li> </ul>	Interactive Lecture Or Seminar	One and half hour
Aspects of a good doctor	<ul> <li>list the qualities of a good doctor</li> <li>explain the roles of a doctor in the society</li> <li>mention expectation of the patient, attendance and society from a doctor</li> <li>state the factors affecting the expectation of the patient, attendance and society from a doctor</li> <li>describe means of developing as a good doctor</li> <li>mention some current examples of a good doctor</li> </ul>	<ul> <li>Qualities of a good doctor</li> <li>Roles of a doctor in the society</li> <li>Expectation of the patient, attendance and society from a doctor</li> <li>Factors affecting the expectation of the patient, attendance and society from a doctor</li> <li>Means of developing as a good doctor</li> <li>Some current examples of good doctor</li> </ul>	Interactive Lecture Or Seminar	One and half hour

### **Integrated Teaching in phase III**

All the departments of Phase III (Community Medicine & Public Health, Pathology, Microbiology) must be present and take part in the integrated teaching while the faculty representatives from concerned clinical & others departments will also participate actively. Teachers will be the speakers in each session. Participation of the students of phase III should be ensured. Students need to get some 'take home message' from every session. To ensure presence of the students Schedule for integrated teaching session will be set at the phase III committee meeting in collaboration with medical education unit (MEU).

Total -20 hour. Each session will be for at least 2 hour

### **Topics:**

- 1. Occupational and Environmental hazard
- 2. Snake bite
- 3. Transportation injuries
- 4. Disaster management
- 5. Shock
- 6. Glomerulonephritis
- 7. Rheumatoid Arthritis/ Osteomyelitis
- 8. Different Viral Fevers (Covid-19, Dengue, Chikungunya)
- 9. Carcinoma Cervix

Topics	Learning Objective	Core contents	Discipline involved
Occup ational and Enviro nment al hazard	At the end of the session student will be able to:  • define environment • explain concept of hazard • list of occupational and environmental health hazards • define occupational health and mention its objective • explain various occupational environment • describe preventive strategies of occupational and environmental hazard • mention the health care facilities and safety measures for workplace. • state work's man compensation act.1923 • describe existing law for	<ul> <li>Environment and its components</li> <li>Concept about hazard, Risk and vulnerability</li> <li>Environmental control strategy</li> <li>Existing law about environmental control</li> <li>Occupational health, and its objectives</li> <li>Occupational environment</li> <li>Occupational health hazards, ergonomics</li> <li>Principles of prevention of occupational diseases</li> <li>Employees' benefits</li> <li>Existing health related occupational laws.</li> </ul>	<ul> <li>Community         Medicine &amp; Public         Health</li> <li>Forensic medicine &amp;         Toxicology</li> <li>Medicine/         Respiratory         medicine.</li> <li>Skin and VD</li> <li>Microbiology</li> <li>Pathology</li> </ul>
Snake bite	<ul> <li>environmental control</li> <li>mention different types of snake in Bangladesh</li> <li>state the natural habit of snake</li> <li>mention different snake bite geographic area in Bangladesh</li> <li>state the difference between poisonous and nonpoisonous snake and snake bite</li> </ul>	<ul> <li>Epidemiology of snake bite in Bangladesh</li> <li>Types of snakes</li> <li>Habit of snakes</li> <li>Geographic Area of snake bite in Bangladesh</li> <li>Outcome of snake bite</li> <li>Management of snake bite</li> </ul>	<ul> <li>Community         medicine &amp; Public         Health</li> <li>Forensic medicine &amp;         Toxicology</li> <li>Medicine/Neuron         medicine</li> <li>Pathology</li> <li>Pharmacology</li> </ul>

	<ul> <li>mention the sign symptom of poisonous and nonpoisonous snake bite</li> <li>mention the composition of snake venom.</li> <li>explain consequences of snake bite</li> <li>select the anti venom and it's dose</li> <li>state the treatment facilities in Bangladesh</li> <li>outline the management of snake bite</li> <li>state the preventive measures of snake bite</li> </ul>	<ul> <li>Treatment facilities of snake bite in Bangladesh</li> <li>Prevention and control measures of snake bites.</li> </ul>	
Trans portati on injurie s	<ul> <li>define transportation injuries.</li> <li>mention the types of transportation injuries.</li> <li>state the courses, consequences and epidemiology of RTA</li> <li>describe problem statement of RTA</li> <li>mention the identification of driver</li> <li>describe the preventive measures of RTA</li> <li>state the management of RTA</li> </ul>	<ul> <li>Definition of TI</li> <li>Epidemiology of TI including RTA</li> <li>Causes of different TI</li> <li>Consequences of RTA</li> <li>Management of RTA         <ul> <li>Triage</li> <li>ABCDE</li> </ul> </li> <li>Preventive measures of RTA         <ul> <li>Safety education</li> <li>Safety measures</li> <li>Legislative measures</li> </ul> </li> </ul>	<ul> <li>Community medicine &amp; Public Health</li> <li>Forensic medicine &amp; Toxicology</li> <li>Orthopedic surgery</li> <li>Neurosurgery</li> <li>Physical medicine</li> <li>Internal medicine</li> </ul>
Disaste r manag ement	<ul> <li>define disaster</li> <li>classify disaster</li> <li>mention the consequences of disaster</li> <li>describe the management of disaster including forensic aspect</li> <li>mention the preventive measures.</li> <li>Describe the technique of disaster victim identification</li> </ul>	<ul> <li>Definition of disaster</li> <li>Classification of disaster         Natural         Man made</li> <li>Consequences of disaster</li> <li>Management of disaster         Injured         Dead         Medico legal         aspects         Media,         VIP,crowd</li> <li>Prevention of disaster</li> </ul>	<ul> <li>Community medicine &amp; Public Health</li> <li>Forensic medicine &amp; Toxicology</li> <li>Medicine</li> <li>Orthopdic surgery</li> <li>Neurosurgery</li> <li>Physical medicine</li> </ul>
Shock	At the end of the session students will be able to:             • define shock             • mention different types of              shock             • describe the pathogenesis of              shock             • enumerate the clinical feature             • list the required laboratory             investigation             • manage the shock	<ul> <li>Definition of shock</li> <li>Types of shock</li> <li>Clinical stages of shock</li> <li>Compensatory mechanism of shock</li> <li>Pathogenesis &amp; complications of shock</li> <li>Management of shock</li> </ul>	<ul> <li>Pathology</li> <li>Microbiology</li> <li>Medicine</li> <li>Pharmacology</li> <li>Forensic Medicine &amp; Toxicology</li> </ul>

Glome	At the end of the session students	<ul> <li>Review of renal anatomy</li> </ul>	Pathology
rulone	will be able to:	<ul> <li>Definition of</li> </ul>	<ul> <li>Microbiology</li> </ul>
phritis	<ul> <li>define glomerulonephritis</li> </ul>	glomerulonephritis	<ul> <li>Pharmacology</li> </ul>
	<ul> <li>classify the glomerular disease</li> </ul>	<ul> <li>Pathogenesis</li> </ul>	Medicine/
	<ul> <li>describe the etiopathogenesis</li> </ul>	<ul> <li>Types &amp;clinical</li> </ul>	Nephrology/
	<ul> <li>mention clinical presentation</li> </ul>	presentation	Paediatrics
	diagnose the disease	(glomerulonephritis &	Forensic Medicine &
	• outline the management of the	nephrotic syndrome)	Toxicology
	disease	<ul> <li>Diagnosis</li> </ul>	romeorogy
	• state the prognosis of the disease	<ul> <li>Management &amp; prognosis</li> </ul>	
Rheu	At the end of the session the students	• Immunopathogenesis	Microbiology
matoid	will be able to:	Clinical features	Pharmacology
Arthri	• explain the		Pathology
tis	immunopathogenesis of the	• Investigation	
	disease	• Complications	Orthopaedic
		• Conventional NSAIDs	surgery/Surgery
	diagnose the disease by its clinical feature and	Disease modifying agents	Physical     Madiaina (Madiaina)
	investigation findings	<ul> <li>Biological disease modifying</li> </ul>	Medicine/Medicine
	-	agents	Forensic Medicine &  The interval of the second secon
	list the complications of the  discusse		Toxicology
	disease		
	• outline the management of this		
0.4	disease		
Osteo	At the end of the session the students	• Etiopathogenesis	Microbiology
myeliti	will be able to:	• Site of involvement	<ul> <li>Pharmacology</li> </ul>
S	• enumerate the causetive agents	<ul> <li>Diagnosis</li> </ul>	Pathology
	of osteomyelitis	<ul> <li>Management</li> </ul>	Orthopaedic
	explain pathogenesis of the	<ul> <li>Complications &amp; its</li> </ul>	surgery/Surgery
	disease	management	Forensic Medicine &
	• enumerate the site of		Toxicology
	involvement in the disease		
	process		
	<ul> <li>diagnose the disease</li> </ul>		
	<ul> <li>outline the management of this</li> </ul>		
	disease		
	<ul> <li>describe the complications of</li> </ul>		
	this disease and their		
	management		
Differe	At the end of the session the students	• Structure of the virus	<ul> <li>Microbiology</li> </ul>
nt	will be able to:	• Mode of transmission	Pathology
Viral	• mention the structure of the virus	<ul> <li>Pathogenesis</li> </ul>	Pharmacology
Fevers	• explain the mode of transmission	Clinical stages	Community Medicine
(Covid	of the disease	<ul> <li>Investigations</li> </ul>	& Public Health
-19,	• explain the etiopathogenesis of	• Prevention	Medicine/Respiratory
Dengu	the disease	• Complication	Medicine Medicine
e,	mention the organ involved in	Management	Forensic Medicine &
Chiku	this disease	<ul><li>Drug used with their site of</li></ul>	Toxicology
nguny	explain the mechanism of organ	action	1061083
<b>a</b> )	involvement	action	
	• list the complications of the		
	disease		
	<ul> <li>describe the laboratory diagnosis</li> </ul>		
	.41 .4 .4		
	•		
	of this disease		

	<ul> <li>outline the management of this disease</li> <li>mention the drug used with their site of action</li> </ul>		
Carcin oma Cervix	At the end of the session students will be able to:  • mention the clinical importance of disease  • describe etiopathogenesis of Ca cervix.  • enumerate clinical presentation & gross morphology  • mention the complication of Ca cervix  • diagnose Ca cervix  • mention the precaution & screening of Ca cervix	<ul> <li>Prevalence of disease</li> <li>Predisposing factor</li> <li>Clinical feature</li> <li>Etopathogenesis</li> <li>Diagnosis(gross &amp; morphological findings)</li> <li>Management &amp; cytotoxic drugs</li> <li>Prevention</li> </ul>	<ul> <li>Pathology</li> <li>Microbiology</li> <li>Pharmacology</li> <li>Gynaecology</li> <li>Oncology</li> <li>Forensic Medicine &amp; Toxicology</li> </ul>
